Attn: David Austin

Dear Mr. Austin,

Thank you so much for the home tour and the presentation you gave to the Engineering class from Laurens Central School on April 12. I know the students were attentive and interested because of the questions they asked. This information was important to the students because it gave them a concrete, practical experience and a view of science at work in the real world. Some of them have actually talked to their families about installing solar in their homes. I appreciate you taking your valuable time to spend with us, and hope we can continue this relationship in the future.

I am sure you agree with me that preparing our students for careers in math, science, and engineering is critical. That is why it is so beneficial for them to see first-hand what opportunities are available to them when they complete their education. Thank you again for providing this chance for them to interact with professionals such as yourself and for giving them the encouragement to pursue their goals in this field.

Sincerely,

Alton Dunn
Teacher, LCS
